What is this product?

Type

The Fund is a form of Collective investment in transferable securities (“UCITS”), as defined by the provisions of Law 4099/2012 and the Directive 2009/65/EC as applicable. The Fund has no legal form, constitutes a group of assets that is composed of securities, money market instruments and cash, the individual elements of which belong to more than one unitholder, based on the number of units they own, is managed by the Company which represents the unitholders both judicially and extrajudicially, for legal relationships arising from the management and their rights over its assets.

Term

The Fund has an indefinite duration and is terminated in case any of the conditions referred to in article 9 par. 1 of Law 4099/2012 are met and in accordance with article 11 of the Fund’s Regulation.

Objectives

The Fund aims to achieve a total return from capital growth and income over the medium to long-term, through the active management of a diversified asset allocation portfolio, investing primarily in international markets. The Fund adopts an investment strategy that promotes environmental and/or social characteristics and as a product, it meets the requirements of Article 8 of Regulation (EU) 2019/2088 of the European Parliament and of the Council (the SFDR Regulation) as in force from time to time. Detailed information is available in the Fund's Prospectus. The Fund invests in large capitalization equities listed on international exchanges, mainly on developed markets, euro-denominated bonds issued by companies, governments or authorities and entities related to governments, as well as money market instruments and deposits with credit institutions. There is no limitation regarding the credit risk assessment or the maturity of the bonds in which the Fund invests. The portfolio management is based on quantitative and qualitative assessment of fundamental factors, with the purpose of identifying those asset classes that offer the highest risk adjusted expected returns, along with selecting individual securities. The Fund may use derivative financial instruments for the purpose of its investment objective and/or hedging risks. The use of derivatives may affect, positively or negatively, its performance.

In order to protect the interests of existing unitholders, the Company may activate a mechanism to prevent the dilution of the Fund's assets (anti-dilution levies - ADLs), with the maximum additional contribution amounting to 0.5%. The daily limit on the amount of requested subscriptions/redemptions above which this mechanism is triggered is 5%.

Benchmark: 50% S&P Global 100 Capped Price Return USD Index, 40% Bloomberg Euro Aggregate Bond Total Return Index, 5% FTSE/CoreCommodity CRB Excess Return USD Index, 5% Barclays Benchmark Overnight EUR Cash Index. The Fund is actively managed in the context of its investment policy and is not limited by the composition of its benchmark, which is used for the purpose of comparing performance. Consequently, Fund’s portfolio composition and performance may deviate materially from benchmark composition and performance.

Income generated by the Fund may be reinvested.

The reference currency of the Fund is EUR.

The investor can subscribe or redeem units of the Fund, during business days and hours in Greece according to the opening hours of Alpha Bank branches, unless there is a relevant decision of the Hellenic Capital Market Commission to suspend redemptions.

The “ALPHA GLOBAL ALLOCATION BALANCED FUND” is exposed to market risk arising from fluctuations in the portfolio’s market value, attributed to market movements. The Fund is exposed to currency risk arising from the exchange rate fluctuations and affecting the valuation of the assets that are traded in a currency other than the Fund's reference currency and to credit risk arising from the possibility that the obligor might be unable to meet its obligations to a UCITS. The Fund is also exposed to liquidity risk, the risk that certain assets of the Fund cannot be liquidated at the desired time or at a limited cost, in order for the Fund to comply at all times with its redemption obligations. In more detail, the risks associated with the Fund are presented in the next section “What are the risks and what could I get in return?”.

Intended retail investor

To investors with a mid to long-term investment horizon, four years minimum (recommended holding period) and a moderate investment profile who wish to invest in a diversified asset allocation portfolio, mainly in international markets.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. On a risk scale 1 to 7, we have classified the Fund at 3 which is a “medium-low” risk class. This classification rates at a “medium-low” level the potential losses from future performance of the Fund and poor market conditions are very unlikely to have an impact on the capacity of the Fund, legally represented, to pay you through its Depositary. Other relevant risks of the Fund not included in the summary risk indicator are issuer credit risk (the risk of a bond issuer(s) to meet its/their obligations, resulting the Fund to be unable to retrieve part of its investment), liquidity risk, the risk that certain assets of the Fund cannot be liquidated at the desired time or at a limited cost, in order for the Fund to comply at all times with its redemption obligations and operational risk, the risk of loss for the Fund that may arise from human errors or omissions, process errors, system failures or external events, including risks related to the custody of the Fund’s assets. The Fund does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, the average, and the best performance of the Fund over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 4 years		If you exit after 1 year	If you exit after 4 years
Example Investment: 10.000 EUR			
Scenarios			
Minimum	You could lose some or all of your investment		
	What you might get back after costs	6.090 €	5.840 €
Stress	Average return of each year	-39,1%	-12,6%
	What you might get back after costs	9.570 €	9.210 €
Unfavourable	Average return of each year	-4,3%	-2,0%
	What you might get back after costs	10.030 €	11.090 €
Moderate	Average return of each year	0,3%	2,6%
	What you might get back after costs	10.370 €	12.670 €
Favourable	Average return of each year	3,7%	6,1%

The figures shown include all the costs of the Fund itself as well as the distribution costs you may pay to your distributor. It may not include your advisor’s costs. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. The unfavourable scenario occurred for an investment between July 2024 and August 2025. The moderate scenario occurred for an investment between September 2016 and September 2020 and the favourable scenario between April 2020 and April 2024.

What happens if the Company is unable to pay out?

The Depositary ensures that the Fund’s assets are kept separate from their own assets as well as those of its other clients without being affected in the event of default of the Company’s payments. There is no compensation or guarantee system for investors.

What are the costs?

The person advising on or selling you this product in the context of providing investment services, may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, the holding period and the Fund’s performance. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the Fund performs as shown in the moderate scenario
- 10.000 EUR is invested.

	If you exit after 1 year	If you exit after 4 years
Total costs	492 €	1.228 €
Annual cost impact (*)	4,9%	2,8% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 5,4% before costs and 2,6% after costs.

These figures include the maximum distribution fee that the person selling you the Fund may charge (3,0 % of amount invested). This person will inform you of the actual distribution fee.

Composition of costs

How long should I hold it and can I take money out early?

Recommended holding period: 4 years

The Fund has no minimum required holding period. Although there is not a minimum required holding period, it is recommended for investors to maintain their investment for 4 years (recommended holding period or RHP). This RHP is chosen based on an assessment of the asset mix risk, reward profile and costs of the Fund. You have the option to redeem part or all of your investment, any business day with the respective redemption fee (if any). The redemption of Fund's units is mandatory when requested by the unitholder in accordance with the specific provisions set out in article 7 of the Fund's Regulation.

How can I complain?
